How to get an International Vaccination Certificate

Anyone with COVID-19 vaccinations registered on the Australian Immunisation Register (AIR) and who has a valid passport can get their International Vaccination Certificate.

The easiest way to get your international certificate is through **your Medicare account in myGov** or the **Express Plus Medicare mobile app**.

To get a certificate, you'll need to have your passport with you.

Your domestic Medicare proof of vaccination <u>will not</u> be accepted for international travel.

Refer to this instructional video on how to get one:
